

Have a Cusco Strut Bar and it gets in the way of carrying luggage?

The Cusco Quick Release Lever is compatible with the Cusco Type-OS Strut Tower Bar, allowing for the center section of the bar to be removed without the use of tools. This innovative, yet simple product enables performance without sacrificing the daily routines of the automobile such as carrying groceries.

Dissassemble the quick release.

Insert Quick Release Lever and hand-tighten.

Rotate lever until snug and lock the lever down.

Type-OS Quick Release Lever
Part No: 00B 540 C
MSRP: \$54.00 (USD)
***2 pieces included**

Quick Release Levers will not affect the performance of the strut tower bar.

- * Cannot be used on Type-3 strut tower bars.
- * Some applications may require slight modification if the lever mechanism comes in contact with other components.
